

The major Geo event on Russian market
March 14-17, 2005

The 2nd International Industrial Forum GeoForm+
invites your company to participate in the following exhibitions:

GeoMap - Geodesy, cartography, geoinformation and control systems

GeoTech - Technologies and equipment for exploring natural resources

GeoTunnel - Technologies and equipment for tunnel construction

GeoMineral - Industrial Minerals - mining, extracting, preparation, recycling

Location: Sokolniki Culture & Exhibition Centre, Moscow Russia

Organizer: MVK Holding Company

Support by: Ministry of Natural Resources of the Russian Federation

In the file attached you will find more information about GeoForm+ Forum.

Please, visit our web-site: <<http://www.geoexpo.ru>>

Please, share this information with your professional community.
If you are interested to be an informational sponsor of the GeoForm+ 2005,
please, contact us.

Sincerely,

Anna Kozina

Exhibition Director GeoForm+

International industrial forum 'GEOFORM+'2004. Final press release
<<http://www.geoexpo.ru/2004/eng>>The 2nd International Industrial Forum

GEOFORM+

Russia, Moscow
Sokolniki Culture
& Exhibition Centre
March 29 – April 01, 2005
www.geoexpo.ru

Organizer:
MVK Holding Company
Support by:
Sokolniki Culture & Exhibition Centre
Ministry of Natu

Organizers:
MVK Holding Company
Russian Federal Service of Geodesy and
Cartography

The 2nd international specialized exhibition

GeoMap

geodesy, cartography,
geoinformation and control systems

- Topography
- Cartography: maps, atlases, equipment, software
- Geoinformation: data, secondary data, databases, distribution of information, GIS software, documents and control systems
- Photographic survey: equipment, software, scanners for aerial photography
- Nature management
- Navigation and communication
- Remote sensing
- Land and real estate (use of geoinformation technologies and spatial data for estimation of real estate objects (allotments, buildings, constructions))
- Training and employment of geodesy and cartography experts

Exhibition subjects:

- Geodesy: tools for carrying out research, software, related accessories and supplies
- Satellite technologies

The 2nd international specialized exhibition

GeoTech

technologies and equipment
for exploring natural resources

Organizer:
MVK Holding Company

Exhibition subjects:

- Geological survey and prognostication
- Equipment for geological survey
- Equipment for geophysical research and exploration
- Units and equipment for geotechnological research
- Equipment for engineering and geological research
- Geological and economic basis. Informational and analytical control systems
- Preliminary and exploration drilling
- Search and exploration of underwater offshore fields
- New technologies for exploration of natural resources
- Education and training of experts in the sphere of geotechnologies

International specialized exhibition

GeoMineral
Industrial Minerals

Organizers:
MVK Holding Company
Industrial Minerals Association

Exhibition subjects:

- Industrial minerals and their recycled products

Stone materials

Technical stone materials (lapidary, semi-precious and ornamental stones, piezooptic and abrasive materials, insulating and inert materials, fire-, water- and alkali-proof, moulding and filtering materials, sorbents, catalysts, active admixtures)

Construction stone materials (facing, saw, pitch-faced and hewn materials, breakage)

Mineral raw stuff

Mining raw stuff (fluxing materials, fire proof, ceramic, glass, cement, raw for artificial and natural filling materials, petrological stuff)

Mining & Chemical stuff (agrochemical and chemical, mineral pigments)

- Technologies and equipment for extraction, preparation and recycling industrial materials
- Investment projects on new field development and reorganization of acting mining enterprises in the sphere of industrial materials
- State and problems of geological survey and restoration of mineral resources, innovative methods in restoration of mineral resources base.
- Appliances, control and automation devices/ Laboratory equipment
- Packaging of enterprises goods / Products transportation
- Environmental protection and ecological safety in the process of extraction, recycling and transportation of mineral raw and products
- Education and training of experts in the sphere of industrial mineral resources

The 2nd international specialized exhibition

GeoTunnel

technologies and equipment for
tunnel construction

Organizers:
MVK holding Company
Russian Tunneling Association

Exhibition subjects:

- Design of tunnel track
- Material and constructions for tunnels
- Calculation of tunnel constructions
- Tunnelling
- Equipment, technologies and materials for different kinds of tunnelling
- Waterproofing and draining units, ventilation units
- Microtunnels
- Main tendencies of tunnelling techniques development
- Related services

The 2nd International Industrial Forum

GEOFORM+

March 29 – April 01, 2005

Sokolniki Culture & Exhibition Centre

Moscow, Russia

APPLICATION FORM

We'd like to participate in (please specify the trade show):

Company: _____

Address:

Phone: _____

Fax: _____

E-mail: _____

Contact person _____

Required space
Floor space only **Floor space and
standard booth construction**
(Please underline)

	sq.m
--	------

Signature _____

Name and job title _____

1 sq.m of in-door exhibit space - 165 € *

Construction of standard exhibition booth (per 1 sq.m.) – 50 €*

Registration fee and information in the Catalogue (up to 50 words in Russian and in English) and at

www.geoexpo.ru website – 350 €*

***VAT included**

The application form is to be sent by fax: +7 (095) 268-99-04, 105-34-86.

or by e-mail: auk@mvk.ru

Tel: +7 (095) 105-34-86

For more information please visit www.geoexpo.ru

Russia – Geo market is on the move!

The International Industrial Forum “GEOFORM+ - 2005” will take place on March 14-17, 2005, in Moscow, Russia, at Sokolniki Culture & Exhibition Centre.

The Forum includes 4 specialized exhibitions: “GeoMap” – geodesy, cartography, geoinformation systems and control systems; “GeoTunnel” – technologies and equipment for tunnel construction; “GeoTech” – technologies for exploring and researching natural resources; “GeoMineral” – Industrial Minerals – mining, extracting, preparation, recycling.

The Ministry of Natural Resources of the Russian Federation, the Federal Service of Geodesy and Cartography of Russia, the Tunnel Association of Russia, and the Industrial Minerals Association supports the Forum.

GEOFORM+ subjects include geodesy, satellite technologies, GPS-technologies, topography, cartography, geoinformation, photogrammetry, nature management, navigation and communication, remote sensing, geological survey and prognostication, tunnel building, industrial minerals and their recycled products, technologies and equipment for extraction, preparation and recycling industrial materials.

The participants of GEOFORM+ are more than 100 Russian and foreign companies - Leica Geosystems AG (Switzerland), Thales Navigation, AGRU Kunststofftechnik GmbH (Austria), CETCO, Ecomir, GFK, GPScom, Heymann Untertage Technik (Germany), Septentrio (Belgium), Federal Service of Geodesy and Cartography of Russia, Ural optical-mechanical plant, Geostroyizyskaniya, Geokosmos, Pergam, Atlas Copco and many others.

The 3rd Congress of geodesists and cartographers of Russia, the 22nd Session of the Intergovernmental Council for geodesy, cartography, cadastre and Earth remote sensing of CIS countries, the Day of Leica Geosystems AG as well as presentations of other firms will take place in the Forum's scope.

The Forum topicality

The timeliness of GEOFORM+ is stipulated by the drastic development of geology, geodesy and cartography, which currently takes place in Russia. This is due, first of all, to the growth of construction and the development of the State system of nature monitoring which lead to the increase of needs in large-scale ground survey, new detailed high-resolution maps and systems of their application. The improvement of the Russian transport network and active development of regions with a complex relief also create a demand for the advanced geoinformation system.

The world experience testifies that creation and introduction of cutting-edge technologies is an indispensable condition for economics' successful development. All positive changes in the industry obviously require up-to-date equipment and technologies. These are the reasons of the current growth of demand in dedicated equipment and services. As Russian equipment producers do not satisfy all needs of the market, there is a strong necessity in import. Today Russia represents one of the largest and the most prospective markets for manufacturers and suppliers of geodesic and cartographical production.

GEOFORM+ - owing to the combination of related branches and the comprehensive promotional campaign - will evidently draw together many potential Russian buyers of dedicated equipment.

The topicality of GEOFORM+ subjects and the right choice of fairground (Sokolniki Culture & Exhibition Centre – one of best the fairgrounds of Moscow) will enable exhibitors and visitors to find new partners and achieve high commercial profit.

MVK Holding overview www.mvk.ru

The organizer of GEOFORM+ is MVK - one of major international exhibitions' organizers in Russia and CIS countries. Annually MVK realizes over 100 specialized exhibitions that cover various branches of the industry. MVK has a large net of representative offices - in regions of Russia, in Germany and Canada. In 2003 more than 9500 companies from 55 countries took part in MVK exhibitions. A number of events organized by MVK are included in the international registers of the exhibitions recommended to business-community for participation. Many exhibitions got the approval of the International Association of the Exhibition Industry (UFI) and other national and international organizations.

MVK constantly endeavors to develop and expand exhibition services and to raise the commercial efficiency of its shows. Exhibitions and related events offer participants and visitors excellent opportunities to get useful business contacts, to make acquaintance with new products and technologies.

/about/press_releases/848.stm

On March 10 - 13, 2004 Sokolniki Culture & Exhibition Centre hosted the International industrial forum GEOFORM+ 2004, organized by MVK Holding Company with the support of the Ministry of Natural Resources of the Russian Federation, ROSKARTOGRAFIA Russian Federal Service of Geodesy and Cartography and Russian Tunneling Association.

The Forum was the first exhibition, comprising geology, geodesy, cartography and tunneling. The relevance of subjects attracted a great number of visitors from Russian regions and foreign countries. Over 100 Russian and foreign companies participated in the exhibition: Leica Geosystems AG (Switzerland), Thales Navigation, AGRU Kunststofftechnik GmbH (Austria), Atlas Copco, CETCO, Ecomir, GFK, GPScom, ROSKARTOGRAFIA Russian Federal Service of Geodesy and Cartography, Ural optic & mechanical plant, Geostroyizyskaniya, Geocosmos, Septentrio, Pergam etc.

The exhibition subjects covered the issues of nature management, mineral wealth exploitation, natural objects monitoring, large-scale projecting and survey works, new high-resolution detailed maps and systems of their processing.
