

Worldwide Survey on SDI

An international web survey has been made by the Consortium including the Laval University, Faculté de foresterie et de géomatique, GEOIDE, as well as the Centre de recherche en geonautique in Canada. The first results of the Evaluation has been announced on 9th June, 2004. These results are available for the those of HUNAGI, who participated in the completion of the related questionnaire. This Call was circulated by HUNAGI.

Now, the valuable findings of the international web survey will taken into account at the elaboration of the Hungarian National Spatial Data Infrastructure Strategy. The start with SDIS was accepted recently as part of the action plan of the Strategic Analysis Subcommittee orchestrated by the Coordination Office of the Interministerial Committee on Information Society (ICISCO)
