

Biographical Sketch for Zsolt Nagy

Zsolt Nagy is Manager of the Coordination Program at the North Carolina Center for Geographic Information & Analysis, the lead state government agency for geographic information systems in North Carolina and staff to the North Carolina Geographic Information Coordinating Council. He provides executive support and consultation to the Council, and provides oversight to the development of NC OneMap, an intergovernmental initiative to organize the geospatial data assets of all government agencies, as part of a statewide enterprise that complements national programs. He works regularly with coordinators and officials from local, state, and federal programs to help create efficient collaborative solutions with geospatial technologies. Prior to his current position, he has fulfilled the roles of GIS Computing Consultant, Database Administrator, Project Manager, Production Manager, and Technician in nearly 25 years of service to the State.

Raised in Upstate New York, Zsolt now lives with his family in Cary, North Carolina. He is a graduate of North Carolina State University in Raleigh, NC and Paul Smiths College of the Adirondacks, NY. He has participated in international forums on GIS, including the Global Spatial Data Infrastructure, and a Sister-State program that has involved North Carolina, North-Rhine Westfalia, and Hungary. Zsolt is the current President of the National States Geographic Information Council. In addition to the pleasures of work and family, he enjoys running, hiking, trips to the coast, garden work, and neighborhood activities.
